

## VISITORS WIN FIRST PRIZES

After four days and nights of continuous curling the Carbon bonspiel was brought to a close on Friday night last with the final games in the consolation event. In the two major events the Grand Challenge, and the Ontario Laundry, the visitors took first prizes, and again in the consolation event, a visiting rink won out.

With 23 rinks entered, Carbon's largest bonspiel was recorded and it is to be hoped that the record will be broken in another year.

The final games in all events were very close and the waiting room and walk in the rink were crowded throughout the games with interested spectators, more interest being taken by the public than ever before at a local bonspiel.

Prize winners in the Grand Challenge were: Roberts, Drumheller, first; F. Poxon, Carbon, second; Webb, of Swallow, third; and Leitch, Carbon, fourth.

In the Ontario Laundry event prize winners were: Calder, Trochu, first; Webb, Swallow, second; S. Reid, Carbon, third and F. Poxon, Carbon, 4th. In the consolation event, Calderwood of Grainger won first, L. Poxon, Carbon, second, Malton third, and McKibbin, fourth.

Games played in the Grand Challenge event of the Carbon Bonspiel were: Jealous from Torrance; Malton from McNichol; Roberts from L. Poxon; Bye from S. Reid; Webb from Fowler; Stone from Jackson; W. Reid from Calderwood. With nine rinks getting byes in this event it brings the competition into the sixteens where F. Poxon won from Calder and Leitch from Greenan; Hunter from Skerry Fairbairn from Wright; Jealous from Malton; Roberts from Bye; Webb from Stone; W. Reid from McKibbin. To bring this event into the fours, Roberts won from Jealous; Webb from Reid; F. Poxon from Hunter; Leitch from Fairbairn. In the semi-finals Roberts won from Webb and F. Poxon from Leitch; In the final game Roberts won from F. Poxon.

In the Ontario Laundry Event Hunter won from Malton; Calder from L. Poxon; Jackson from Bye; Fowler from Torrance; Fairbairn from Leitch; Jealous from Calderwood; W. Reid from Skerry. With nine rinks getting byes in this event it brings the competition into the sixteens where F. Poxon won from Stone and Greenan from McNichol; Roberts from McKibbin, Webb from Wright; Calder from Hunter, Fowler from Jackson, Fairbairn from Jealous; S. Reid from W.

## OLD TIMERS' ASSOCIATION TAKES IN ALL WEST

This year the Carbon Old Timers' Association has advanced the age limit for membership and now all persons residing in the west prior to December 31st, 1909, and now living in the Carbon district, are eligible to attend their annual celebration on February 5th. Children of old timers born prior to this date are also eligible for membership.

It must be remembered that all old timers before becoming members of the Association should have their membership cards to entitle them to the privileges of the Association. These cards can be secured from the secretary at the hall on the night of the celebration.

The Carbon Old Timers celebration this year will be in the form of a dance instead of the usual whist and dancing, and a program will be carried out besides, we are told. With the limit for membership being extended this year, it is expected that a record crowd will attend, especially with the admission charge being so low.

## ALBERTA'S NEW GAME ACT MAY BE POSTPONED

Whether or not the new game act will be introduced at the approaching session of the Alberta legislature is now under consideration by the government. The act was tentatively agreed upon as a uniform law, with some minor divergences, for the three prairie provinces, but it is understood that in both Saskatchewan and Manitoba some difficulties in the way have arisen, and the measure will likely be held over in those provinces.

There is a fair chance, however, of Alberta deciding to go on with the proposed legislation alone.

The gravel crew is now working just this side of Acme and expect to be up in this district in about a week. We understand they are needing 2-ton trucks, for which they are paying 12c a yard per mile. Mr. McManus is the man to see; he is now at Acme, but will be in town soon.—Three Hills Capital.

Reid. In the eights Calder won from Fowler; S. Reid from Fairbairn; Webb from Roberts; F. Poxon from Greenan. In the fours Calder won from Reid and Webb from F. Poxon; In the final game Calder won from Webb.

Consolation Event—Poxon won from Wright, McKibbin from Skerry, Calderwood from Torrance, Malton from McNichol. In the fours, Poxon won from McKibbin and Calderwood from Malton. In the final game Calderwood won from Poxon after a close game.

## ALBERTA NEWS

Establishment of a packing plant at Edmonton by the Alberta Livestock Pool is under consideration, it was revealed at the annual convention of the United Farmers of Alberta.

Throughout the municipality the question of a municipal doctor has been a great deal under discussion. A meeting was to have been held at the Burwash school Wednesday evening but owing to the weather it had to be postponed.—Carbonay Sun.

Canadian wheat in store on the continent for the week ending January 15, decreased a million bushels under the previous week.

Policing of Alberta by the Royal Canadian Mounted Police and the winding up of the Alberta Provincial Police force was approved by the United Farmers of Alberta last Thursday.

The Athabasca by-election, necessitated by the death of John F. Buckley, Liberal, will be held March 21, it was announced by the chief electoral officer this week. March 17th will be nomination day. P.W.L. Clark of Athabasca has been appointed returning officer.

Empowering of municipalities to have made up and on hand several coffins of various sizes to be sold at cost, but not to exceed \$30, so that residents in the various municipalities can avail themselves of reasonable funeral costs, was approved in a resolution passed at the Friday night session of the U.F.A. convention.

Tommy Keele, business manager of the Drumheller Miners, and Gus Gustason, star centre for the miners, had a narrow escape Friday night when their car went into the ditch, turned over and burned.

Report that the provincial government will shortly announce an increase in the gasoline tax in current in the province. The present tax of 5 cents a gallon will be increased to six cents, according to the report.

## FORD PREPARES NEW EIGHT PLUS OLD FOUR IMPROVED

DETROIT—The Ford Motor Company is preparing for production of a new eight-cylinder motor-car, it is now definitely established here. The present Model A four will be continued, with improvements.

Mr. Henry Ford, again at the helm and devoting all his time to direction of the company's affairs, recently surprised the industry after ordering parts for a new four, the Model B, by suddenly changing his plans and setting specialists working on development of an eight.

It was said by many that this meant abandonment of the four, but it now seems certain that an improved Model A will come out as a companion to the new eight. It also is believed possible that the improvement in the four will include a marked body change.

Since retooling operations will require a month or two, March is the earliest month that production on the new eight could get under way.

It is taken for granted by many that the price of the new eight will be in the same general class as that of the Model A, but there is much speculation on this point.

Meanwhile production of the Model A continues on a small scale, about 35,000 units, including those not yet assembled, remaining to be sold.

## UNIQUE SUBSCRIPTION OFFER

We are pleased to announce to our readers that we have made arrangements with the Family Herald and Weekly Star for a combination rate on that farm journal and the Carbon Chronicle, for a year's subscription, new or renewal. Any of our readers who wish to take advantage of this rate can do so for the sum of \$2.25. This offer will only be good for sixty days.

## Hockey Notes

Several hockey games have been played at the local rink within the past week. All games have been interesting to watch and in every game the local boys played their part.

The first game was on Saturday afternoon when the Acme Juniors played the local juniors. After ten minutes of overtime the score was 3-3 and the game ended in a draw.

Immediately following this game the Hesketh juniors played the Cubs here and Carbon won out. We have no record of the score.

## Acme Wins from Carbon

The Acme seniors played the local senior team here on Sunday afternoon and Acme came out victorious, this time by a 4-3 score. The game was close and comparatively fast for the condition of the ice. In the first period the local boys scored one goal, this being the only counter in the twenty minutes of play. In the second period Acme was the first to score. Carbon came back with another and before the period was over Acme again scored making it 2-2 at the end of the second. When the third period opened play was fast and the Acme boys scored twice in quick succession putting them two up. With five minutes to go Carbon played five men up and were successful in scoring with only two minutes to go. They could not score again, however, and the game ended 4-3 for Acme.

## Carbon Wins from Three Hills

The best game of the season was played here on Monday night when Three Hills in a fast encounter with the Carbon hockey team, lost to the locals by one point. The Carbon boys got away to a flying start and skated the visitors off their feet in the first twenty minutes of play, making four goals to the visitors one. In the second period the visitors came back with two goals and Carbon netted another giving the locals a two-goal lead at the commencement of the last twenty minutes to play. The last period was a little ragged and Three Hills tried to even up the score. They did succeed in making another counter but could not find the net again before the final bell rang and Carbon came out on the long end of the 5-4 score.

Carbon's line-up for the last game was: A. Turcotte, goal; Defense, Alex Poxon, Ben McLeod; forwards, H. Edwards, J. Knox, L. Trepanier; Bruce Ramsay, E. Rouleau, L. Trepanier, George Wise acted as referee.

## TEN COMMANDMENTS FOR LEAP YEAR MAIDS

A Kansas city Judge has announced ten commandments to guide women seeking to take advantage of leap year. The Carbon Sewing Circle can also make a note of this.

They follow:  
Don't pick a snail.  
Don't let a handsome face influence your better judgement.  
Don't shy from the bashful because the bashful are shy.  
Consider the man who considers his nickles.  
Believe not the man with the motor car has the only vehicle to happiness.  
Remember, clothes may make the man and fill the clothes closet, but

## TO HAVE MIXED BONSPIEL SOON

The long talked of Mixed Bonspiel at the local curling rink is about to materialize and plans are going forward for the event, which is to commence at 4 p.m. on Monday, February 1st.

All ladies who wish to curl in this bonspiel are asked to enter their name before Friday, January 29th, at 6 p.m. with either Mr. A. F. McKibbin, or Mr. A.H. Jealous.

The proposed way in which the mixed bonspiel will be carried out, is to take out all third men from the twelve local rinks and replace them with ladies, who will play third. The twelve third men will elect six skips amongst themselves and the other six third men will play second. These new rinks will have a lady playing third and will have to pickup a new man for lead.

All entrants in this bonspiel will have to pay 25c each to go for prize money. There will be three events and should one rink win an event they will be disqualified for prizes in any of the other events, although they will be able to play through in the other competitions.

## FIVE UNITED STATES PLANTS LOCATE IN CANADA

Since the first of this year five American industries have incorporated in Canada and have begun or are preparing to manufacture, according to the Industrial Department of the Canadian National Railways. Two of the companies are automobile concerns. The Hudson Motor Car Company of Michigan has formed a subsidiary, the Hudson-Essex of Canada Limited, and will start manufacturing cars at Tilbury, near Windsor, Ontario, within a few weeks. The other motor car concern is the Walter Motor Truck Company, which has secured space in Toronto and will produce motor cars and snow fighters. The other American companies locating in Canada are the Arrow-Hart and Hegeman Electric Company, which is establishing in Toronto for the manufacture of electric wiring and switch devices; the Kellogg Manufacturing Company, makers of Air Compressors, paint-spraying equipment, etc., in Toronto; and the Simrall Refining Corporation, which will establish a refinery with a capacity of 5000 barrels of oil daily at Amherstbury, Ontario.

they don't fill the pantry.  
Don't delay the proposal because he is old fashioned—he may be like your father.

Demand much character but be satisfied with a small part of the pay check.

Don't be finicky; you have faults yourself.

Let love be the only consideration; after all, nothing else counts.

Remember! When the next printing salesman walks into your office and asks you for a printing order, tell him that there is a printer in town and that he CAN do that particular job.

### In Times Like These

In the course of the more or less extensive reading in which every man in newspaper work must engage, our attention was attracted by a magazine article bearing the title "In Times Like These," written by former U.S. President Calvin Coolidge. Coming from the pen of such a noteworthy man we felt assured that it would be a worthwhile article. We were not disappointed, and have decided to pass on to the circle of readers of this weekly column some of the thoughts expressed by the only living ex-President of the United States, in the hope and expectation that they may be found helpful and provide encouragement to others.

Mr. Coolidge expresses the opinion that one of the serious results that come from the experience through which the world has been passing for the past two years is "loss of faith," and he proceeds to show that if a man but keeps his faith, regardless of anything and everything that may happen, there is still a bright future before him.

The difficulty is that because some have put their trust in things which they have found do not always endure, they draw the hasty and unwarranted conclusion that it is useless to have faith in anything. Furthermore, there is a tendency, and it is easy, to conclude that whatever disasters may have overtaken an individual for him to conclude that they have arisen through no fault of his own; rather that it is the fault of someone, and he is inclined to blame something he loosely calls society.

It is true that some have lost through the dishonesty of others. Many more have lost because they were tempted to take large risks in the hope of making large gains. Some did make large profits, but many more suffered heavy losses. Frankly, it must be said that those who trust to chance must abide by the results of chance. They have nobody to blame but themselves.

In Western Canada, however, probably the larger number of losers are to be found in Mr. Coolidge's third group, those who have sustained losses notwithstanding the exercise of their best judgment and through causes beyond their own individual control. But this simply means what everyone should know: that even when surrounded by all the safeguards and all the integrity which is possible to secure, the ownership of property involves a risk. The man who has nothing runs no risk; it is the man who has property who is liable to suffer. Nevertheless no sane person prefers to be the former rather than the latter.

The man who owns a house may lose it by fire, by flood, by a devastating storm. A man's livestock may sicken and die. A man may lose his crops by drouth, or hail, or insect pests. World conditions may force prices to a below-cost-of-production basis. He cannot help these things, but that does not excuse him from making the most of what he has. The great fact of life is uncertainty, as Mr. Coolidge points out. The only thing we can do is to recognize the uncertainty and govern ourselves accordingly.

It might be a great personal comfort if we could lay all the blame for our misfortune upon some source outside ourselves. That is why it is easy to convince some of us that we have not failed, but society has failed. But while there is a relationship of all of us, which we term society, that differs from each of us, just as a house differs from the individual bricks in it, yet people are not bricks, and moral responsibility cannot be shifted to others. If we are to be free to make our own choices in life, we must take the risk of being responsible for the results.

If we could lay the blame for present conditions in the world on society at large, against whom is the blame to be assessed? It is impossible to point out any general moral lapse, any widespread dishonesty. We may say it is the result of greed and selfishness. But what body is to be specifically charged with that? Were the wage earners too greedy in getting all they could for their work? Were the managers of enterprise, big and little, too greedy in trying to operate at a profit? Were the farmers too greedy in their production or in co-operating to get higher prices for their products.

No, the most we can say is that there has been a general lack of judgment so widespread as to involve practically the whole world. Each and every one of us must assume our full share of responsibility for that lack. We have found out that we were not so big as we thought we were. We were riding too high. We shall have to keep nearer the ground. We may not feel so elated but we shall be much safer.

We must realize that the best recipe for financial security is to live within our means. That is our ancient faith. We have found nothing better.

We must re-learn the old Biblical admonition: "Thine own right hand can save thee." We must realize that Governments are not all-powerful, that present relief measures are but a crutch to help us for a moment when we cannot otherwise help ourselves, but that our salvation, our whole future, rests with us as individuals.

There is no power that can absolutely guarantee us economic security. We think we want relief from toil and worry, forgetful that our real satisfactions are in our achievements. If we will but make the effort to develop them, if we will apply ourselves faithfully to our tasks, we shall all find we have powers we did not know we possessed.

The total value of building and construction awarded in Canada during 1931, as compiled by MacLean Building Reports, Limited, amounted to \$315,482,000. Ontario led all the provinces with \$125,452,300, or 39.8 per cent. of the Dominion total. Quebec comes next with \$106,125,700 or 33.6 per cent.

It has been estimated that Colombia's waterfalls could be harnessed to produce more than 4,000,000 horsepower.

The total expenditure by the different Provinces of Canada on main provincial highways during the year 1930 was \$34,502,759.

### Palpitation of the Heart Could Hardly Get Around

Mrs. Charles Storms, R.R. 5, Picton, Ont., writes: "I was troubled with palpitation of the heart; couldn't sleep, day or night, and was so weak I could hardly get around."

After taking Milburn's Heart and Nerve Pills I was greatly relieved of these attacks.

My mother also has great faith in them and finds no other medicine can help her so much for heart trouble.

I can assure you that Milburn's Heart and Nerve Pills are a wonderful builder."

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

### Astrologer Makes Some Unpleasant Predictions

Says 1932 Hard Year For Cattle and Married People

Prof. Gustave Meyer, of Hoboken, New York, who describes himself as "the nation's counsellor and American scientific astrologer" cast his eyes heavenward, added up several rows of figures and predicted that 1932 is going to be a tough year for cattle and married people.

In scanning the planets for his annual first-of-the-year forecast, Professor Meyer considers that Japan and China are going to have much trouble, and that Japan will get the best of it in the long run. He feels that prohibition is going to have "a terrible time" during 1932, that prosperity is coming back to stay, that Colonel Lindbergh and Henry Ford had better watch their step in February and that next Fall there will be plenty of rain, snow, hail, thunder and lightning, floods, earthquakes, bank failures, broken legs and stomach trouble.

Among those who will suffer during the year, according to the professor's charts, are theatrical people, hotel and restaurant people, steamship people, bull traders, naval officers and cabinet members.

Those who will enjoy good luck include literary people, scientific people, astrologers, mining men, real estate agents, President Hoover, soldiers, diplomats and all the unemployed.

### Stockmen Elect Officers

Meeting Of Canadian Livestock Co-Operatives Held At Saskatoon

W. A. Amos, of Palmerston, Ontario, was elected president of the Canadian Livestock Co-Operatives at a meeting of the directors held at Saskatoon. He succeeds W. D. MacKay of Saskatoon. Roy McPhail, Brandon, was elected vice-president of the organization.

Directors for the provinces are: Alberta—J. E. Evanson, Taber; Saskatchewan—W. D. MacKay, Saskatoon; Manitoba—Roy McPhail, Brandon; Ontario—W. A. Amos, Palmerston; Quebec—J. T. Desmarais, Montreal; Maritimes—J. McClellan, Prince Edward Island.

Persian Balm tones and stimulates the skin. Fragrant as a flower. Cool as morning dew. Safeguards and beautifies the most delicately-textured skin. Creates complexions of exquisite charm. Adds a subtle finish to the daintiest woman. Invaluable for softening the hands and making them flawlessly white. Cool and refreshing. Daintily fragrant. Delightful to use. Chosen unhesitatingly by all women who care for feminine distinction.

### Real Benefit To Farmers

Shipping Club In Quebec Markets Produce To Advantage

A fine example of the real benefit to farmers in getting together to market their products is afforded by the results obtained by the Campbell's Bay Shipping Club, of Pontiac County, Quebec. This year to date, the club has marketed 250 head of cattle, 250 calves, 1,150 lambs, and over 12,000 pounds of dressed poultry, representing cash returns to the farmers of that district of well over \$15,000. The Federal and Provincial Departments of Agriculture have co-operated effectively in making the scheme the a success.

Sores Heal Quickly.—Have you a persistent sore that refuses to heal? Then, try Dr. Thomas' Electric Oil in the dressing. It will stop sloughing, carry away the proud flesh, draw out the pus and prepare a clean way for the new skin. It is a recognized healer among oils and numbers of people can certify that it healed where properly applied.

### Cannot Hoard Gold

Viennese who have taken to hoarding gold in their mouths in the form of fillings, crowns and bridgework have bitten off more than they can chew. Firms which cast gold bridges and similar material for dentists, have been doing a good business lately. The National Bank, which now has the sole right to sell gold, says temporary fillings will have to do until the gold crisis is past.

The modern telephone instrument consists of 201 parts.

### New Ideas For Cars

Many Advanced Methods Will Feature Automobiles Of Future

The automobile industry, in its quest for new features to intrigue the buying public, spends millions of dollars annually in experimentation on advanced methods of automobile construction. Many of the ideas which result from the extensive research of the industry's engineers seem radical at first glance, but are a forecast of what may be expected for future automotive transportation. Among the many possible developments discussed in engineering circles is such a startling suggestion as a gasolineless, waterless car, propelled by radiated electricity. Another unusual proposal calls for the use of an airplane type of construction for cars, with large fenders and a combined roof and wing structure lifting a considerable amount of weight from the road, and with propulsion furnished by a propeller.

### Drop In Living Costs

Reduction Of Fifteen Per Cent. During Last Two Years

Cost of living has dropped by over 15 per cent. during the past two years, the Dominion Bureau of Statistics reports. This is the second largest decrease among the leading nations, the United States leading with a drop of 16.5 per cent.

Germany ranks third with a 12.9 per cent. drop, Great Britain fourth with 9.6, and France fifth with 8.9 per cent. One of the reasons Canada, United States and France rank so high is the extensive agricultural developments of these countries.

Toothache and neuralgia are instantly relieved with Douglas' Egyptian Liniment. A quick, sure remedy. Also recommended for burns, sprains, sores and inflammation.

### Land and Water Ferry

Hotel guests at Devonshire, England, now use a ferry that travels on land or sea. It is equipped with tractor wheels for land, and a propeller is driven off the tractor motor to drive the ferry through water.

In 1807, the first rafts of pine cut in the Ottawa Valley reached the City of Quebec.

### Man Without a Country

Pitiable Plight Of Negro Who Was Deported From Canada

Chained to a grating in the hold of a ship in port, where he has remained for more than a month, is another man without a country.

He is Cecil Jafes Scott, 29-year-old negro deported from Canada and unwanted in his alleged homeland of Bermuda. He was put aboard the steamer "Borsund" at Halifax, and when permission was refused to land him at Bermuda or Demerara where the authorities had no information concerning him, the only alternative was to bring him back to Canada. Having previously been deported from the Dominion, he was refused admission when the "Borsund" arrived at St. John, and now the captain and immigration officials are wondering what they shall do with the passenger.

The steamer's owners are liable to a \$1,000 fine if the deportee escapes. So "down below," in an improvised cell formed by a grating, is the "man without a country," his right wrist fastened to the steelwork and a blanket serving for a bed.

Complete in itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

### Ship Fox Skins

Seven Thousand Pelts Leave Quebec For London Market

During recent days 7,000 fox skins have been shipped from Quebec to be placed on the London fur market, according to information given out at the office of the Co-Operative Fur Animals Raisers of the province of Quebec. This shipment of skins, the largest ever sent out from here, is valued at \$200,000 and consists only of skins of the best quality.

In the face of orders on hand at present, Co-Operative officials say, it is probable that an additional 13,000 skins will be placed on foreign markets in the very near future.

## Says Farmers Should Pay More Attention To Marketing Instead Of Concentrating On Production

Expressing the belief that the next 25 years would see the emancipation of agriculturists from domination by bodies outside themselves, H. S. Arkell, secretary of the Canadian Livestock Pool and president of the Canadian Society of Technical Agriculturists, speaking at a gathering of the latter organization at Saskatoon, asked their assistance in that regard. The society had made great strides since it was formed in 1921, and now included most of the technically trained agricultural men of the Dominion. In the past the members had chiefly concerned themselves with their own jobs and the co-ordination of work done under different authorities to make it efficient. They had accomplished a great deal in that direction.

But Mr. Arkell believed the time had come for the society to turn its attention to study the condition of agriculture. It was for the betterment of agriculture that they had received their training.

From the point of view of the farmer, the selling machinery under the old methods had failed them, the credit machinery had fallen down and they would find that the majority of farmers believed that the technical machinery of agriculture was failing to accomplish the purposes of the farmers.

Agriculture had taken care only of production and left someone else to take care of marketing. In all other businesses an increasing proportion of the brains was devoted to merchandising. Something should grow up in technical agriculture in regard to the business end as in production.

It was planned, the speaker said, to hold the annual convention of the society in Winnipeg in June, when it might be possible to secure speakers from the economic conference.

Dr. L. E. Kirk, Dominion Agrostologist, suggested that other businesses had perhaps devoted too much attention to merchandising and persuading the people to buy what they did not want, rather than that agriculture had given too exclusive attention to production.

W. A. Munro, Rosthern experimental farm, agreed that farmers at the present time were much more concerned with what they were to do with what they had produced than with how to produce more or better articles.

Guests introduced at the gathering included: C. H. Gilbert, Big River, spring wheat champion at the Chicago show, and Andrew Anderson, Alaskan, recently designated "master farmer."

### Royal Palace a Public Museum

Ex-King Alfonso's former royal palace at Madrid has been opened as a public museum. For the sum of one dollar visitors are allowed to see the throne room, sitting rooms, banquetting halls, the famous "Hall of Columns," where so many functions, including that of the washing of feet on Good Friday, took place, but so far they have not been permitted to visit the private apartments and bedrooms formerly occupied by King Alfonso, Queen Ena, and the Infantas.

Neighbor: "Er — Mrs. Brown — you've got odd stockings on."  
Mrs. Brown: "Yes, dearie, that often 'appens to ladies what 'ave got more than one pair."

"How did you get so much strength in your mouth?"  
"I have exercised my teeth with your steaks." — Il 420, Florence.

W. N. U. 1926

### Greater Precipitation

Report Of Meteorological Service For Months Of December Is Encouraging

Precipitation in Saskatchewan over the cultivated portion, during December, 1931, was approximately twice that of December of the normal year, according to the report of the Dominion meteorological service for the month.

In average years, precipitation in December varies from four-tenths to about eight-tenths of an inch. During December, 1931, from one inch to one and a half inches was reported over a considerable area in Saskatchewan.

In the extreme southeast and in a small area to the east of the Cypress Hills several points were exceptions, reporting less than four-tenths of an inch of precipitation received during December.

Alberta rejoiced in precipitation that was in excess of the normal. In December from one inch to one and a half inches was reported from a considerable portion of the plains. Usually the December precipitation in these areas varies from less than one-half to about three-quarters of an inch. A dry December was the experience of Manitoba, where most sections reported less than half an inch and some less than one-tenth.

In the majority of years, December precipitation is slightly greater in Manitoba than in Saskatchewan, ranging from one-half inch to one inch. — Regina Leader.

### Apples Are Cheap Food

Essential Part Of Diet and Suitable For Every Meal

In a period like the present, when the amount of money available for food may be limited, apples are an essential part of the diet, says Miss Flora Carl, of the Missouri College of Agriculture. "Apples are suitable for every meal in the day and are often enjoyed between meals also," she goes on. "As sauce or baked, apples serve as a breakfast fruit, and with bacon or sausage they may accompany the meat dish. For dinner they are especially good with fresh or cured pork, no matter how it is cooked. They are adapted to cooking with many vegetables, as baked with sweet potatoes, fried with carrots or scalloped with cabbage. A wide variety of salads may be made from apples, either raw or cooked with vegetables, and the choice of apple desserts is almost unlimited.

A writer asserts that a man's character can be told by the books on his library shelf. Then most of our friends are kleptomaniacs.

### Egg Exports From B.C.

Are Bringing Producers Over Five Thousand Dollars Daily

British Columbia hens are bringing into the pockets of poultry owners, as a result of growing volume of shipments of eggs outside the province, in the neighborhood of \$5,000 a day.

The B.C. Egg Pool is shipping to the prairies and eastern Canada three and four carloads of eggs weekly. Private firms are adding further shipments, which, according to G. R. Wilson, of the poultry division, Dominion Live Stock Branch, bring the total up to one carload daily.

Each carload at Montreal brings an average of \$7,000. There must be deducted from this freight charges of approximately \$850 and handling charges of five cents a dozen.

The egg industry is at present the liveliest department of agriculture in British Columbia. Distribution of \$5,000 a day among poultry ranchers is bound to stimulate confidence in the poultry industry.

Egg prices are much lower than at the same time in 1930. Production is also lower. Nevertheless, present prices are attractive to the coast poultry owners. Lower feed prices and lower labor costs help to make up for the reduced prices received for the product.

George P. Wallace, president of the B.C. Egg Pool, reports falling off of production of eggs elsewhere in Canada.

Prof. E. A. Lloyd, University of British Columbia, says that the present export of eggs is but the beginning.

"I look to see British Columbia poultrymen exporting eggs to overseas markets as well as our domestic markets," said Professor Lloyd.

### France Buying Wheat

French Government Contracting For Ten Million Bushels Of Canadian Grain

Delivery has started on a French government contract to buy 10,000,000 bushels of Canadian hard spring wheat, the United Press learns.

The agreement represents a repetition of an order for a similar amount in 1930. Delivery will continue for two months.

It was understood that France expected a reciprocal concession from Canada favoring either French wines or silks, but no agreement has been reached.

It was estimated that France still requires 11,000,000 bushels of foreign wheat to meet the deficit in domestic supplies.

Wheat representatives were awaiting indications of whether the foreign office would continue the policy of buying Central European wheat for political reasons, or would buy the balance in the open market from Canada, the United States and Argentina.

Nearly 40 irrigation projects are to be launched in Jugo-Slavia in the next four years.

## Scientists Hope To Procure Facts And Figures To Test The Theory That Continents Float

### Sensitive To Weather Changes

Animals Are Very Quick To Notice Any Variations In Weather

Animals are amazingly sensitive to changes of weather, and some very interesting observations have been made as to how they behave under such circumstances. We have all seen the antics cats get up to when a storm is approaching. They wander recklessly to and from, and suddenly dart about the house and garden in a most surprising manner. Cats, too, wash right over their ears when rain is approaching. The following are other unmistakable signs of changing weather: In mountainous districts sheep change their feeding ground to the lee side, or side opposite the wind, of the hills before the arrival of gales and rain. Little field mice, too, appear to know when cold and snow will set in, for they have been observed to cover up their holes carefully before hard weather comes. Donkeys invariably bray lustily before rainy weather, and if bees return to the hive and do not come out again for a time rain is indicated.

### Farm For Strayed Animals

Fifteen Acres Operated By Voluntary Workers In Montreal

"The League of Justice To Animals" with voluntary workers operate a farm of 15 acres at Montreal, the only one of its kind in Canada, where lost, strayed or unwanted animals found on the streets of Montreal and environs are taken, and when not claimed within a reasonable time are placed with new owners. At this home there are adequate kennels for cats and dogs, stables for horses and good grazing land with plenty of shade trees. Every type of creature is cared for from goats to canaries. Horses whose owners are too poor to feed them properly are taken and within a short time returned in good condition.

In the society's six years of befriending the dumb animals, it has had four Christmas trees set up in various parks and squares here distributing hay, corn and oats to 100 horses yearly.

### Noise Affects Eyesight

One person in every five in the towns and cities is wearing, or ought to be wearing, spectacles. The proportion in the rural areas is only one in every 100. An eye specialist said: "During the war one of the effects of shell-shock was a narrowing of the victim's vision. Perfect eyesight depends on perfect nerves, and town dwellers today are exposed to a nerve-shattering barrage of noise which differs only in degree from a great gun cannonade.

Hidden away in vaults in Dominion observatories at Victoria and Ottawa are scientific records that may prove or disprove some day the truth of the theory that North America and the other continents are not fixed or stationary. Dr. Alfred Wegener, the Austrian geologist who lost his life in Arctic exploration, laid down the theory that continents float on a sea of molten rock like rafts on a quiet ocean. Canadian scientists hope to supply the facts and figures that will determine the accuracy of the theory.

Canada is vitally interested in settling the Wegener theory because Greenland is supposed to be the "speed king" among the continents, crawling westward at a rate estimated as high as six miles a year. Meteorological conditions, especially along the Labrador Coast, the Maritime Provinces and the New England States, would be affected by any appreciable narrowing or lengthening of the distance between the two land masses.

Delicate scientific observations were made some years ago at the Dominion Government Observatories at Victoria and Ottawa. Longitudinal measurements were extended around the world with the aid of beam wireless. The positions of America, Greenland and other countries were plotted as minutely as possible. The observations will be repeated in 1933 and again in 1936, and any variation in the plottings will be noted. By this method it is hoped to establish the accuracy of Dr. Wegener's hypothesis.

The first evidence to substantiate the drifting theory was established in 1907 by J. B. Koch, German explorer. In 1823—84 years earlier—Sir Edward Sabine, British scientist, made longitudinal observations in Greenland but when Koch took similar readings at the same spot, the figures did not correspond. The only explanation was that Greenland had drifted several miles toward North America in the intervening years.

### Great Natural Asset

High Grade Clay Deposits In Saskatchewan May Prove Foundation Of Great Industry

One of the greatest natural assets of the prairie provinces is constituted in the high grade clays of southern Saskatchewan, said G. M. Hutt, assistant director of development for the Canadian Pacific Railway, speaking at a luncheon held by the officers' association of the company at the Royal Alexandra Hotel in Winnipeg. He said that they would in time be the means of support for an immense clay products industry.

In describing these valuable western resources, Mr. Hutt told of the general work of his department in fostering Canadian industry by locating deposits of minerals and sources of other raw materials and by assisting in bringing these materials into use. W. C. Casey, president of the association, was chairman.

### Advertising Always Pays

The business has not been found in which "advertising does not pay." What capital is to industry, what rainfall is to farm soil, advertising is to business. Advertising is as necessary to national distribution as the railroads.

"You are bandy-legged, Fridolin."  
"That is nothing. You ought to have seen my brother. He was so bandy-legged that he had to be buried in an old bass viol." — En Rollig Half Timma, Gothenborg.

### BRITISH SPEED EXPERTS PLAN SERIOUS INVASION OF EUROPE

An invasion by a team of British racing drivers with British cars into the most cherished preserves of Continental road racing is contemplated by a group of the best drivers in the Motherland. The Italian "Mille Miglia" or 1,000-mile race, held every spring, is the only contest of its kind in the world, and last year, for the first time in the history of the race, an English car competed, driven alternately by an English and an Italian driver, neither of whom could speak the other's language. It finished successfully, much to the surprise of the Italian people. In this year's race, April 9 and 10, British drivers propose to enter a team of three cars, which would be driven by the best racing team the Motherland could produce. Sir William Morris, British motor magnate, will back the venture, and Sir Henry Birkin (right), will be one of the drivers. It is expected Lord Howe will captain the teams.

# BABY'S COLDS

BEST FOR ADULTS, TOO

## WORLD HAPPENINGS BRIEFLY TOLD

A Chinese boycott against Canadian salt fish is causing serious curtailment of trade on the Pacific coast.

Efforts to secure a preference for Canadian lumber in South Africa are being made in Ottawa by a committee in British Columbia.

A wooden chessboard was found in the ancient temple of Abou Simbel on the east of the Nile in Egypt in the hills of Doha.

Ireland is having the worst floods in 30 years because of uninterrupted rains which have inundated thousands of acres of farm land and forced many families out of their homes.

David M. Shearer, 52, died January 14, from pneumonia. He was an outstanding construction engineer and had charge of the Government elevator construction at Churchill.

Dr. Hugo Eckener, commander of the giant German dirigible, Graf Zeppelin, was awarded the 1931 medal of the International Aeronautic Federation.

A bylaw making prohibitive the sounding of locomotive whistles or clanging of their bells within the city limits between the hours of 10 p.m. and 7 a.m. has been passed by the city council of Quebec.

Sir Henry Fielding Dickens, only son of Charles Dickens, the novelist, spent his 83rd birthday at his post of common sergeant of the City of London, England, an ancient magisterial position.

The John Scott award of \$1,000 was presented jointly to Juan de la Cierva and Harold E. Pitcairn for the invention and development of the autogyro. John Scott was a chemist of Edinburgh, Scotland.

Over 50 tons of express and 34,892 pounds of mail were carried on the north route between Edmonton and Akavik, by planes of a commercial aviation company during the season of 1931.

## War's Lessons

Canadians Have Deep Interest in Situation in Manchuria

"We have not forgotten the lesson which we learned in 1914 of what an obscure crime in a Balkan state can mean," said Hon. Vincent Massey, former Canadian Minister to Washington, in addressing the Empire Club on Manchurian problems at Toronto. "Canada needs no argument to show the situation in Manchuria is one to command her active interest."

He referred to the treaty of Washington in 1922, and the Paris peace pact, and said Canada, with the full obligation of nationhood, would have to decide for herself whether either treaty had been infringed or violated. Any trade advantage accruing to Canada through China's boycott of Japan would be more than offset by loss of trade with Japan.

India exported 55,000,000 pounds of tea in a recent month.

## Heavy Fur Catch

Catch This Year Promises To Be Best In Past Decade

The fur catch in the north country this year promises to be one of the best in the past decade. From early reports received from the far north trappers will bring down heavy shipments of furs this spring.

The quality of the furs, a factor that varies from year to year, promises to be high, north trappers claim, because of the climatic conditions that have prevailed in the sub-Arctic regions this year.

While the catch in the more civilized portions of the province will be only average, north of Churchill and in the southern Indian Lake area the catch nears the spectacular. Prices for pelts this year are only average, dealers advise, and the royalty and heavy cost of bringing them into the United States will prove a handicap to disposal this spring it is feared.

The huge Junkers' plane purchased this year by the Canadian Airways will probably bring the furs down from many of the isolated posts in the far north to Winnipeg.

## OH! FOR THE FRESH CHARM OF SPORTS CLOTHES THAT PARIS ADORES

Here's a delightfully smart model that is carried out in tweed-like woollen in deep bright blue mixture, now so modish.

It gives the impression of suit styling. The collar is white pique. The bindings are in navy blue. The belt is navy blue suede.

It has so much dash.

It's such a splendid type for office or college wear.

Style No. 815 may be had in sizes 14, 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Size 36 requires 3½ yards of 39-inch material with ¾ yard of 39-inch contrasting, 5½ yards of binding and ½ yard of 1½-inch ribbon.

Jersey is a favourite this season and adapts itself perfectly to this model.

It may also be made of cantonfaile crepe silk.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Delightful Cruises

Cunard and Anchor Line Steamers Furnish Sea Voyages For Those On Holiday Bent

That the world and his wife are going to sea for their holidays more than ever before is evident in the fact that no less than fifty-six cruises have been arranged for Cunard and Anchor Lines steamers during the remainder of this winter, spring, and summer. This does not include the departure this week from New York of the "Franconia" on her annual five-month cruise of the world.

The Maritimes and the St. Lawrence will get a good share of this cruise tourist business, for twelve cruises will call at Canadian ports which will form their main attraction for thousands of New Englanders expected on these short trips from New York.

Last summer the "Transylvania" made three experimental voyages to Quebec and Halifax from New York, with a 60-mile cruise up the Saguenay River. She is the largest vessel ever to navigate this famous waterway, and on each voyage she was booked to capacity. This summer and fall there will be six such 12½-day cruises, by this steamer and her sister ship the "California" which will then make her first appearance on the St. Lawrence. Other cruises in which Canadian ports will be featured are three six-day cruises from New York to Halifax and Bermuda on the express "Mauretania," during the summer. The Anchor liner "Caledonia" will make a 9-day cruise to Halifax, on August 27th, and on October 20th, a 10-day voyage will be made to the same port by the "Transylvania."

Several short summer cruises on express Cunarders and two Labor Day week-end cruises by the "Transylvania," and the "Berengaria," largest Cunarder, are also scheduled to call at Halifax. Elaborate arrangements for seeing Acadia are being made for these passengers.

Short, inexpensive trips to the West Indies continue to be popular, their success being indicative of the price trends of today. A call at Miami has been introduced into the itinerary of eight 9-day cruises to Havana and Nassau by the "Caledonia," the visit to the Florida playgrounds of the wealthy proving a great attraction.

More leisurely visits to the West Indies will be made on three voyages of the "California," and two on the "Scythia," ranging from 12 to 23 days and visiting all the high spots in the islands as well as calls at Panama and the South American mainland.

Bermuda retains its hold on the imagination of the cruise tourist public, the "California" and "Samarra," one of the 20,000-ton Cunarders, being listed to make Easter cruises from New York of 9 and 8 days respectively.

## This Independence

A farm laborer in England who had been out of work for many months and had been living on the dole, remarked to his physician one day: "Doctor, do you know I had an offer to work some days ago which would have given me five shillings more a week than I am getting from the dole, but after thinking it over carefully, I preferred to remain independent."

## Bilious For Days At Time Until She Took Vegetable Pills

Gratefully, Mrs. C. writes: "The first dose of your wonderful Carter's Little Liver Pills gave me great relief after every medicine I tried failed."

Because they are PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels, Dr. Carter's Little Liver Pills are without equal for correcting Constipation, Acidity, Headaches, Poor Complexion and Indigestion. 25c. & 75c. red pkgs. everywhere. Ask for Carter's by NAME.

## SUNDAY SCHOOL LESSON

JANUARY 31

## JESUS FEEDS THE MULTITUDE

Golden Text: "Jesus said unto them, I am the bread of life; he that cometh to Me shall not hunger, and he that believeth on Me shall never thirst."—John 6:35.

Lesson: John 6:1-71.

Devotional Reading: Psalm 34:1-11.

## Explanations and Comments

Jesus and the Multitude, verses 1-4.—With His disciples Jesus crossed to the eastern side of the Sea of Galilee (or the Sea of Tiberias, as it was also called from the City of Tiberias which Herod Antipas had built on the western shore of the lake in honour of the Emperor Tiberias) and, climbing the hillside sat down for a quiet conference with them.

The Testing Of Philip, verses 5-7.—When Jesus saw the crowd He turned to Philip and asked him where they were to buy bread for them. Philip was a practical man of affairs and he made a hasty calculation. Two hundred shillings' worth of bread would not supply even a little for each one.

The Evangelist adds, "This He said to prove him; for He Himself knew what He would do." The difficulty of the task tested Philip's faith. The one thing necessary was that he should turn the problem over to his Master with full faith that He could solve it, and should offer to help as the humble instrument by whom the people could be served.

The Lord's Supply, verses 8, 9.—Andrew, Peter's brother, then said that there was a lad among them who had five barley loaves and two fishes, "but what are these among so many?" he exclaimed. The emphasis is on the word "but." Andrew saw the poverty of the visible supply; he failed to see the richness of the invisible Power.

The Miracle, verses 10-13.—At the direction of Jesus the people sat down on the grass, about five thousand men besides the women and children, Matthew 14:21. They sat in companies of fifty, that the distribution might be quickly made. Taking the five barley loaves in His hands, Jesus offered thanks, probably repeating the customary words, "Blessed art Thou, Jehovah our God, King of the earth, who causeth bread to come forth of the earth."

Then Jesus distributed the loaves and fish till all were abundantly satisfied.

When all were satisfied Jesus bade His disciples gather up the broken pieces that were undistributed, that nothing be lost. Those fragments filled twelve baskets. Probably each of the Twelve had a provision basket with him. The scantiness of the source, five barley loaves, is again mentioned to emphasize the greatness of the miracle.

## Cleaning Units Needed

To Ensure Distribution Of Clean Seed To Farmers

In order to cope with the cleaning of seed grain for distribution to needy farmers this spring between 400 and 500 travelling seed cleaning machines will probably be necessary.

In addition to this, it is believed by grain men that every privately owned seed cleaning machine will have to be utilized if seed grain is to be properly cleaned in preparation for coming spring work.

Over 6,000,000 bushels seed wheat and at least 2,000,000 bushels of seed oats will be required for distribution before spring, entailing an expenditure of approximately \$9,000,000.

According to C. B. Daniel, manager of the Saskatchewan Relief Commission, the seed grain relief plan in Saskatchewan is a gigantic problem and it is essential that a plan be put into effect as soon as possible.

Definite steps toward adopting a scheme whereby clean seed can be supplied to the farmers of Saskatchewan through the Saskatchewan Relief Commission are being formulated, it is learned unofficially, Thursday, Jan. 14.

## Across Africa By Train

Important Event That Was Calmly Accepted By the World

The first railway train to cross Africa from ocean to ocean started July 1, last year on its journey from Lobito Bay to Beira, a distance of 2,949 miles. The event was a vastly important one and the engineering achievement was worthy of note, but it was calmly accepted by the world. Yet when David Livingstone, the first white man to cross Africa, made the journey in two years, there was hardly anyone throughout all the world who didn't thrill to his grand adventure, and hardly a home where it was not a topic of burning interest. —Wall Street Journal.

## SAFE, SPEEDY PROVEN!

Proven—Thousands of testimonials and the largest sale of any cough remedy in Canada are convincing evidence of its merits. M-13

## BUCKLEY'S MIXTURE

## To Assist Agriculture

Quota System Between Canada and Great Britain For Canadian Wheat

Establishment of a quota system between Canada and Great Britain, for Canadian wheat, was visualized as one of the great hopes for Saskatchewan agriculture in 1932 by J. D. MacFarlane, president of the Saskatchewan Agricultural Societies Association, who presented his annual report to an executive meeting of that association at the University of Saskatchewan.

Mr. MacFarlane also said a change in the styles of obtaining credit by the countries of the world was essential to economic recovery, and he believed cancellation of war debts, to enable world buying power to improve, was necessary if 1932 was to be a better year than the past year.

Even adoption of these changes did not offer much hope for the present year, Mr. MacFarlane believed, but he thought they would tend to make next year more normal and would restore agriculture to a place more nearly approaching its old position.

Dispensing of the high rates of interest paid by one country to another would materially assist, he thought. He believed an international banking committee could render help in the situation, functioning similarly to the League of Nations, but dealing with the financial obligations and requirements of the countries of the world. Each country, under this system, would issue its own currency, instead of borrowing in New York or London, England.

## A New Explosive

Drives Bullet Five Times Faster Than Sound Travels

The modern rifle bullet has a muzzle velocity of 3,000 feet a second. It strikes a tremendous blow, measured in hundreds of pounds. Now a German named Verlich has invented an explosive that will speed the bullet more than a mile a second faster, and will triple its striking power. That is more than five times faster than sound travels.

It is said that 500 different kinds of material are used for the manufacture of shoes.

## BABY FRETFUL, RESTLESS?

Look to this cause

When your baby fusses, tosses and seems unable to sleep restfully, look for one common cause, doctors say. Constipation. To get rid quickly of the accumulated wastes which cause restlessness and discomfort, give a cleansing dose of Castoria. Castoria, you know, is made specially for children's delicate needs. It is a pure vegetable preparation; contains no harsh drugs, no narcotics. It is so mild and gentle you can give it to a young infant to relieve colic. Yet it is as effective for older children. Castoria's regulative help will bring relaxed comfort and restful sleep to your baby. Keep a bottle on hand. Genuine Castoria always has the name:

W. H. Fletcher  
**CASTORIA**  
CHILDREN CRY FOR IT

## RADICAL CHANGE IN MONETARY SYSTEM IS URGED

Edmonton, Alberta.—In a smashing frontal attack on the existing financial system the United Farmers of Alberta, in convention here, condemned the gold standard, called for the complete nationalization of the monetary system and the extension of credit to industry on a basis of cost, not of profit.

The farmers, refused, however, to declare themselves in favor of nationalization of all the banks. They thought, with a national credit system, the banks would either not be needed or would have to render as good service as the national system.

The resolution passed was "Resolved that we, the delegates of the U.F.A., in convention, do endorse the complete nationalization of the monetary system to advance credit on a basis of cost, not on a basis of profit."

Coincident with the demand for a national credit system came a proposal for intensified political action to bring this about. A resolution call for this was defeated only on the ground that the United Farmer members in the Federal Parliament had done all possible.

Complaint was made that the United Farmer Government of Alberta and the farmer members of the legislature had not taken the strong stand on the question which had been taken by the Federal members. The convention called on the Provincial Government and all officers and members of the association to proclaim publicly their belief that monetary reform was the only way out of the depression and so give moral support to the members at Ottawa.

This implied a censure on the Provincial Government, said William Irvine, M.P., of Wetaskiwin. The matter was one for the Dominion Government alone and the Provincial Government had to work under the present system and borrow money from the banks.

"It will soon be apparent that every provincial government in Canada is at the beck and call of the financial interests in Wall Street," said Mr. Irvine. This, he thought, might be good propaganda for the cause of monetary reform.

Farmers should unite with industrial workers to secure political power and so change the system, said Karl Axelsson. There was nothing wrong with the Bank Act except it was in the hands of the wrong people. The producing classes should wrest control from the vested financial powers.

As the convention passed a resolution calling for the abandonment of the gold standard, Henry Spencer, member of parliament for Battle River, said Canada had already gone off the gold standard although the government did not admit it.

Deflation of currency was also favored as a means of increasing the sale of farm products. The suggestion that instead of borrowing money and paying interest "to the great financial powers" for unemployment relief works, the government should issue new paper money, was endorsed.

Amendment of the Bank Act to provide a penalty for any bank or bank official charging higher interest than seven per cent. was asked. This was a reiteration of the demand made in the House of Commons last year by Mr. Spencer.

Another resolution passed called upon the government to make wheat certificates legal tender. It would enable a farmer to take the receipts for wheat delivered to an elevator and use them to make purchases.

The Canadian tariff system was denounced and a resolution declared the time had come for an "all round reduction in our customs duties to the intent that within a period of not less than five years every feature of this barbaric economic superstition be eliminated from the fiscal policy of our country."

It is now possible to select certain sounds for transmission by wireless while other noises from the same sources are suppressed.

W. N. U. 1926

## 'Plane Makes First Trip

Giant Liner Inaugurates Weekly Air-mail Service To Cape Town

London, Eng.—Promptly on schedule time, the giant Imperial Airways' liner "Helena" took off from Croydon aerodrome Jan. 20, inaugurating a weekly airmail service to Cape Town.

The plane carried 20,000 letters and 160 parcels, including a large box of eggs. The passengers were Air Vice-Marshal Sir Vyell Vyvyan, Lady Vyvyan and F. G. L. Bert-ram, Deputy Minister of Civil Aviation.

The London-Cape Town route follows established routes as far as Egypt and then plunges south down the "dark continent," travelling a route worked out first by machines of the Royal Air Force, which did the pioneer work only a few years ago.

## Offered Fellowship

Fellowship In Royal Geographical Society Awarded To Western Aviator

Edmonton, Alberta.—A fellowship in the Royal Geographical Society has been awarded to Pilot Walter E. Gilbert, Canadian Airways, Limited, according to word received in the city. Such an award to an aviator is believed to be unusual.

Pilot Gilbert flies Canadian Airways, Limited, machines from Edmonton to the Arctic Coast, and was associated with Major Burwash on the latter's trip to King William Land and the north magnetic pole in the fall of 1930. He piloted the aeroplane G-CASK on that occasion. This machine, known for steady service and which has been flown steadily by Gilbert for more than a year, is almost as well known as its master.

## Scholarships For Argentina Students

Will Provide Same Facilities As Given Rhodes Scholars

London, England.—The Prince of Wales announced the establishment of a scholarship for Argentina students at Oxford University at a dinner of the Argentina Chamber of Commerce here.

The prince said the scholarship would provide the same facilities as were given to Rhodes scholars from the United States. It would be extended to two students from the University of Buenos Aires annually for at least three years. Each student would stay at Oxford for two years.

## More Air Mail Business

Post Office Officials Report Increase In Prairie Provinces

Ottawa, Ont.—Air mail business in the prairie provinces has increased, post office officials declared, commenting on a despatch from Edmonton, Alberta, which said the U.F.A. convention had passed a resolution urging the abandonment of unprofitable services.

Departmental officials are busy on the estimates for next fiscal year, and the air mail will receive attention among other branches of post office activity. It could not be learned whether the appropriation for this will be increased or cut.

## Value Overestimated

Furs On Baychimo Not Worth Over Thirty Thousand

Winnipeg, Man.—"Ridiculous" was the expression voiced by officials of the Hudson Bay Company in regard to report that the missing fur-trade vessel "Baychimo," lost in the Arctic Circle carried fur pelts valued at \$1,500,000. Officials stated that the total value of pelts on board would not exceed \$30,000. A quantity of pelts had been saved before the vessel disappeared they said.

Don Graham, 35, Alaska air mail pilot, is reported flying to find the ship and seize the furs under salvage laws.

The salmon pack in British Columbia reached a record figure of 2,221,819 cases last year, exceeding the previous record attained in 1926 by 156,629 cases.

## WAR DEBT ADJUSTMENT

Right Hon. Neville Chamberlain, Chancellor of the Exchequer, who will attend Reparations Conference.

## Aviators Stranded In China

Fliers From Canada and U.S. Cannot Get Jobs

Shanghai, China.—Five Canadian aviators and five from United States, who came to China expecting to be given jobs at \$1,000 a month piloting Chinese military aeroplanes, found themselves stranded here.

The aviators said they were promised by Chinese organizations in Canada and the United States the aviation bureau of the Chinese Ministry of War was seeking pilots and would pay the salary mentioned for competent men.

The aviators landed here with practically no money only to be told the government bureau was not looking for pilots at all.

The five pilots from the United States said posters appeared at numerous Pacific coast airports advertising for pilots.

Dr. Philip Chu, Chinese physician at Vancouver, the Canadians said, is president of the Chinese society there and was directing the enlistment of Canadian fliers.

The aviators said they understood more Canadian and United States pilots are coming to China as a result of the promises. The trade commissioners communicated with their respective governments, hoping to forestall the coming of others.

## No Franchise For Women

Bill Introduced In Quebec Legislature Is Defeated

Quebec, Que.—Attempt of the women of the province of Quebec to secure votes in provincial elections failed again in the legislative assembly.

The Women's Franchise Bill, sponsored by Dr. Anatole Plante (Lib., Mercier), went down to defeat by a vote of 52 to 23 on an amendment moved by Arthur Belanger (Lib., Levis), seconded by J. P. Giguere (Lib., Dorchester), giving the bill a six-months hoist.

## TRAGEDY OF SINO-JAPANESE WAR

Rather than be a source of worry to her soldier-husband as he departed for the battle-front in Manchuria, Mrs. Kiyochi Inoue (left), 21-year-old wife of Lieutenant Inoue (right), of the Japanese army, calmly attired herself in her best clothes and stabbed herself in the throat with a dagger her husband treasured. She left a note for her husband, in which she explained the reason for her suicide, and enclosed 40 yen (about \$20), with the request that he spend the money to make his soldiers happy. Her home was in Osaka, Japan.

## President Of U.F.A.

Robert Gardiner Unanimously Chosen To Lead Organization For Second Term

Edmonton, Alberta.—Robert Gardiner was unanimously chosen president of the United Farmers of Alberta for a second term at the annual convention here.

The veteran farm leader, who represents Acadia in the House of Commons and is also leader of the United Farmers of Alberta group in Dominion politics, was given an ovation when no other nominations were offered.

Mr. Gardiner notified the members they had better look around for another president for 1933. He said he found the burden of carrying the two posts of leader of the group in the House of Commons and president of the association too heavy.

Norman F. Priestly, Calgary, was re-elected vice-president by acclamation. A. F. Aiken, Battle River, was also nominated, but withdrew in favor of a renewal of Mr. Priestly's term of office.

## Railways and Truck Competition

Suggestion Made That Railways Must Eventually Co-Operate With Bus Operators

Toronto, Ont.—Further co-operation of railways with bus and truck operators was urged by Hon. Leopold Macaulay, Ontario Minister of Highways, here. Co-operation of provincial and Dominion Governments to this end is essential, he said.

"Railways themselves are partly to blame," said Mr. Macaulay, "if truck and bus traffic is making inroads upon the business of the steam transportation systems." Advisability of co-ordinating the two Canadian railway systems and all phases of transportation would become increasingly evident as time went on, he believed.

"I am looking forward to some suggestions from the royal commission on transportation as to means whereby the railways may co-ordinate truck and bus traffic with their own operations," he declared.

## Cathedral Is Being Turned Into Museum

Soviets Will Use It For Anti-Religious Exhibits

Leningrad, U.S.S.R.—The Soviet government has announced that the Kazan cathedral here would be converted into the largest anti-religious museum in the Soviet Union.

When completed, the museum would contain exhibits of various objects of a religious nature, interpreted along the lines of the late Karl Marx's doctrine, adopted by Soviet Russia, that "religion is opium for the people."

The Kazan cathedral was started in 1801 and completed in 1811 at a cost of approximately \$2,000,000.

## BOYCOTT AGAINST BRITISH GOODS WEAPON IN INDIA

Bombay, India.—The merchants' organization, comprising representatives of markets and exchanges that have been closed for 16 days, laid plans for a mass meeting to protest the arrest of Mahatma Gandhi, Nationalist leader, and ordinances directed against the Nationalist civil disobedience campaign.

Statistics from "authoritative sources" were published purporting to reveal the effect of the Nationalist boycott against British goods. They show Japan has shipped nearly 15,000,000 yards of cloth to India in one month, compared with less than 3,000,000 yards shipped by concerns in Great Britain during the same period.

Two 16-year-old girl students from the University of Bengal went to trial before a special tribunal in Calcutta, charged with the murder of Magistrate C. G. B. Stevens who was shot to death a month ago. Both pleaded not guilty.

A British police sergeant was stabbed in the head at Dacca by an unidentified assailant who stole his revolver and fled. Two suspects were arrested. When a crowd attempted to seize several prisoners in Gorakhpur police fired two rounds of buckshot without wounding anyone.

Sen Gupta, former mayor of Calcutta and a prominent Nationalist, was arrested as he stepped off an Italian ship. No specific charge was lodged against him.

Rev. H. V. H. Elvin, a young missionary, who accused authorities in the northwest frontier provinces of oppression, cruelty and "things that ought to make an Englishman ashamed," said he had been arrested and deported from that area. He blamed special officers for the alleged outrages and paid tribute to the regular British police force, describing its members as real friends of the people.

## Suggests Bonus For Buyer

Proposal Would Benefit Coal Purchaser Instead Of Mine Operator

Calgary, Alberta.—Any step towards improvement in the Canadian coal industry meets the approval of Alberta operators, it was declared by officials commenting on a proposal for a government bonus to the purchaser of coal instead of the mine operator. H. J. Kelly, manager of the Dominion Steel and Coal Corporation, in Sydney, N.S., suggested the government pay a bonus, not to the mine operator, but to the purchaser of Nova Scotia coal.

"At present the subvention from the government benefits the railways, not the purchaser," declared P. R. Shields, manager of Coal Sellers Company, Limited. "Any subvention should result in a lower price to the consumer in order to be of any advantage to the industry."

## Claims Copyright Infringement

Damages Asked For Use Of Photograph Of Prince Of Wales On Two Dollar Bills

Toronto, Ont.—Damages for the use of copyrighted photograph of the Prince of Wales on Dominion of Canada two-dollar bills are being sought by George P. Freeland, local photographer, in an action started against the Canadian Bank Note company, Ottawa.

Mr. Freeland claims that during the visit of the Prince in 1919, he took a number of photographs of his royal highness and copyrighted them. The pictures, he says, were later used on a two-dollar bill.

## Wheat Quota Workable

London, Eng.—The government's revised wheat quota scheme, giving domestic farmers a fixed proportion of the British market is, so far as it goes, more workable than the original proposals, the National Union of Farmers was told at the annual meeting recently by a member who had been one of the negotiators with the government over the plan.

### CHAPTER XI.—Continued.

Jean, glancing enquiringly across at Mrs. Craig, was startled at the sudden change in her face produced by Lady Anne's simple announcement. The sallow skin seemed to pale—almost wither, like a cut flower that needs water—and the lips that had been parted in a smile stiffened slowly into their accustomed straight line.

"Of course"—Mrs. Craig's voice sounded flat and she swallowed once or twice before she spoke—"that must be it. I—knew your father, Miss Peterson."

To Jean, always sensitive to the emotional quality of the atmosphere, it seemed as though some current of hostility, of malevolence, leapt at her through the innocent-sounding speech. "I knew your father." It was quite ridiculous, of course, but the words sounded almost like a threat.

She had no answer ready, and a brief silence followed. Then Lady Anne bridged the awkward moment with some commonplace, adroitly steering the conversation into smoother waters, and a few minutes later Mrs. Craig rose to go.

"I'll see you across the park, Judith," volunteered Nick, and he and his mother accompanied her out of the room.

In the hall, Lady Anne detained her visitor an instant with a light hand on her arm, while Nick foraged for his own particular headgear amongst the family assortment of hats and caps.

"Jean is a dear girl, Judith," she said earnestly. "I want you to be friends with her. Don't"—pleadingly

"—visit the sins of the fathers on the children."

"Why, no, I shouldn't," replied Mrs. Craig, with apparent frankness. "It was only that, for the moment, it was rather a shock to learn that she was—that woman's—child."

"Of course it was," acquiesced Lady Anne. "Goodbye, dear Judith."

But notwithstanding Mrs. Craig's assurances, a troubled look lingered in Lady Anne's grey eyes long after her guest's departure.

### CHAPTER XII.

#### A Sense Of Duty

Jean was immensely puzzled at the abrupt change which had occurred in Mrs. Craig's manner immediately upon hearing that she was the daughter of Glyn Peterson, and, as soon as the visitor had taken her departure, she sought an explanation.

"What on earth made Mrs. Craig freeze up the instant my father's name was mentioned? Did she hate him for any reason?"

Tormarin looked across at her.

"No," he answered quietly. "She didn't hate him. She loved him."

Jean stared at him in frank astonishment. She had never dreamed that there had been any other woman than Jacqueline in Glyn's life.

"Mrs. Craig—and my father?" she exclaimed incredulously.

"She wasn't Mrs. Craig in those days. She was Judith Burke."

"Well, but—" persisted Jean, determined to get to the bottom of the mystery. "I still don't see why."

"Why what?"—unwillingly.

"Why she looked as if she loathed the very sight of me. That's not"—drily—"quite the effect you would expect love to produce!"

There was a curiously abstracted look in Tormarin's eyes as he made answer.

"Love is productive of very curious effects on occasion. More particularly when it is without hope of fulfilment," he added in a lower tone.

"Well, I suppose my father couldn't help not falling in love with Mrs. Craig," protested Jean with some warmth. "Nor could he have prevented her caring for him. And it's certainly illogical of her to feel any resentment towards me on that score. I had nothing to do with it."

"Love and logic have precious little to say to each other, as a rule," replied Tormarin grimly. "To Judith, you're the child of the woman who stole her lover away from her, so you can hardly expect her to feel an overwhelming affection for you."

"The woman who stole her lover away from her?" repeated Jean slowly. "I don't understand. What do you mean, Blaise?"

He glanced at her in some surprise. "Surely—Don't you know the circumstances?"

She shook her head. "No. I simply don't know in the least what you are talking about. Please tell me."

Tormarin made no response for a moment. He was standing with his back to the light, but as he lit a cigarette the flare of the match revealed a worried expression on his face, as though he deprecated the turn the conversation was taking.

"Oh, well," he said at last, evading the point at issue, "it's all ancient history now. Let it go. There's never anything gained by digging up the dry bones of the past."

Jean's mouth set itself in a mutinous line of determination.

"Please tell me, Blaise," she reiterated. "As it is something which concerns my father and a woman I shall probably be meeting fairly often in the future, I think I have a right to know about it."

He shrugged his shoulders resignedly.

"Very well—if you insist. But I don't think you'll be any happier for knowing." He paused. "Still inflexible?"

She bent her head. "Quite"—firmly—"whatever it is, I'd rather know it."

"On your own head be it, then." He seemed trying to infuse a lighter element into the conversation, as though hoping to minimise the effect of what he had to tell her. "It was just like this—that your father and Judith Burke were engaged to be married at the time he met your mother, and that—well, to make a long story short, he ran away with Miss Mavery on the day fixed for his wedding with Judith."

A dead silence followed the dis-

## COULDN'T COMB HAIR

### Crippled by Rheumatism

"I had been suffering with rheumatism for about 2 years, and about this time last year was laid up for 10 weeks. My hands and arms and knees were the worst affected. I could not get about at all. I could not wash my face or comb my hair. All this had to be done for me. At the beginning of this year I started taking Kruschen Salts every morning and I am pleased to say I am quite well now and able to see to my home and can go out in all kinds of weather without it affecting me."—Mrs. P. K.

Rheumatism is associated with an excess of Uric Acid in the system. Two of the ingredients of Kruschen Salts have the power of dissolving uric acid so as to render it capable of being easily washed out of the system. Other ingredients of Kruschen assist Nature to flush out this dissolved uric acid through the bowels and the kidneys. Other ingredients still, prevent food fermentation taking place in the intestine, and thereby check the formation not only of uric acid but of other impurities which poison the blood and pave the way to ill-health.

closure. Then Jean uttered a low cry of dismay.

"My father did that? Are you sure?"

"Quite sure."

Tormarin could see that the story had distressed her. Her eyes showed hurt and bewildered like those of a child who has met with a totally unexpected rebuff.

"Don't take it like that!" he urged hastily. "After all, it was nothing so terrible. You look as though he had broken every one of the ten commandments"—smiling.

Jean smiled back rather wanly.

"I don't know that I should worry very much if he had—in some circumstances. But—don't you see?—it was so cruel, so horribly selfish!"

"You've got to remember two things in justification—"

"Justification?"—expressively. "There wasn't any. There couldn't be."

"Well, excuse, then, if you like. One thing is that Jacqueline Mavery was one of the most beautiful of women, and the other, that your father's engagement to Judith had really been more or less engineered by their respective parents—adjoining properties, friends of long standing, and so on. It was no love-match—on his side."

"But on her wedding-day!"—pitiably. "Oh! Poor Judith!"

Tormarin smiled a trifle cynically.

"That was the root of the trouble."

It was Judith's pride that was hurt—as well as her heart. She married Major Craig not long after, and I believe they were really fond of one another and comparatively happy. But she has never forgiven Peterson from that day to this. And you, being Jacqueline Mavery's daughter, will come in for the residue of her bitterness. Unless"—ironically—"you can make friends with her."

"I shall try to," said Jean simply. "Is Major Craig living now?"

"No. He died out in India, and after his death Judith came back to England. She has lived at Willow Ferry with her brother, Geoffrey Burke, ever since."

There was a long silence, while Jean tried to fit in the new facts she had learned with her knowledge of her father's character. She was a little afraid that Tormarin might misunderstand her impulsive outburst of indignation.

"Don't think that I am sitting in judgment on my father," she said at last. "In a way, I can—even understand his doing such a thing. You know, for the last two years of my mother's life I was with them both constantly, and anyone living with them could understand their doing all kinds of things that ordinary people wouldn't do." She paused, as though seeking words that might make her meaning clearer. "They would never really mean to hurt anyone, but they were just like a couple of children together—gloriously irresponsible and happy. I always felt years older than either of them. Glyn used to say I was 'cursed with a damnable sense of duty'—laughing rather ruefully. 'I suppose I am. Probably I inherit it from our old Puritan ancestors on the Peterson side. I know I couldn't have cheerfully run off and taken my happiness at the cost of someone else's prior right.'"

A look of extreme bitterness crossed Tormarin's face.

(To Be Continued.)

## Uniform Monetary System

### Proposed That Effective Measures Be Taken By the British Empire

A memorandum strongly advocating the introduction of a uniform monetary system for the British Commonwealth of Nations was adopted by the Federated Chambers of Commerce of the British Empire.

The memorandum declares since most empire countries are now off the gold standard the struggle to attract and retain gold has ceased. But, in order to remain competitive in the world's markets, the nations are obliged to force down prices by currency contraction which has led to similar contractions by other nations, neutralizing the first advantage and depressing prices below the cost of production.

This, the memorandum says, has reduced the purchasing power of 91 per cent. of the world's population. So-called over-production, it continues, is really under consumption, owing to restricted purchasing power. No one nation can prevent this deflation, the memorandum contends, and the only group strong enough to take effective measures is the British Empire, within which members would insulate themselves from external competition while re-expanding their currencies, action which would make possible the establishment of sane co-operation.

In all infantile complaints that are the result of the depredations of worms in the stomach and intestines Miller's Worm Powders will be found an effective remedy. They attack the cause of these troubles, and by expelling the worms from the organs insure an orderly working of the system, without which the child cannot maintain its strength or thrive. These powders mean health and improvement.

## New Treatment For Anaemia

### Scientists Claim Extract Injection Will Combat This Trouble

A new and simplified treatment for pernicious anaemia eliminating many of the uncertainties and difficulties of present treatments, has been perfected by research scientists at University of Michigan.

The new treatment involves intravenous injection of concentrated liver extract and obviates the necessity of frequent doses of liver extract or substitutes administered by mouth against which patients rebel.

Four to six injections of the new extract into the veins of a pernicious anaemia sufferer have restored the blood to normal. After the blood has been replenished with red corpuscles, it is possible to maintain this state by single injections at intervals of from four to six weeks.

## When You CAN'T QUIT

Fatigue is the signal to rest. Obey it if you can. When you can't, keep cool and carry-on in comfort.

Aspirin was meant for just such times, for it insures your comfort. Freedom from those pains that nag at nerves and wear you down. One tablet will block that threatening headache while it is still just a threat. Take two or three tablets when you've caught a cold, and that's usually the end of it.

Carry Aspirin tablets when you travel. Have some at home and keep some at the office. Like an efficient secretary, they will often "save the day" and spare you many uncomfortable, unproductive hours. Aspirin is harmless, so keep it handy, keep it in mind, and use it. No man of affairs can afford to ignore the score and more of uses explained in the proven directions. From a grumbling tooth to those rheumatic pains which seem almost to bend the bones, Aspirin tablets are ready with quick relief—and always work. Neuralgia, Neuritis. Any nagging, needless pain.

## You're Worried

When your child is sick you're terribly worried. Of course you can't always avoid sickness, but you can remedy and often prevent children's ailments with Baby's Own Tablets. They are the ideal laxative for children. Doctors prescribe them.

Baby's Own Tablets reduce fever, allay colic, prevent constipation, sweeten the stomach, and help to clear up colds. 25 cents a package at any druggist's.

## BABY'S OWN TABLETS

(Dr. Williams') 175

## Little Helps For This Week

"That the Lord thy God may bless thee in all the work of thine hand which thou doest."—Deuteronomy xiv. 29.

No earnest work. Of any honest creature, howbeit weak, imperfect, ill-adapted, fails so much. It is not gathered, as a grain of sand. To enlarge the sum of human action used.

For carrying out God's plan.

—Elizabeth Barrett Browning.

Our life is but a little holding, lent. To do a mighty labor. We are one With Heaven and the stars when it is spent.

To serve God's aim.

—George Merriديث.

"Find your niche, and fill it. If it be ever so little, if it is only to be hewer of wood or drawer of water, do something in this great battle for God and truth."—Spurgeon.

## Britain and War Debts

So far as this country is concerned there is certainly a widespread belief that general cancellation of reparations and war debts would facilitate economic recovery and, therefore, be generally beneficial; but the British taxpayer would not lightly entertain the idea of cancelling reparations while retaining the burden imposed by war debts.—London Times, England.

Get the genuine tablets, stamped with the Bayer cross. They are of perfect purity, absolute uniformity, and have the same action every time. Why experiment with imitations costing a few cents less? The saving is too little. There is too much at stake. But there is economy in the purchase of genuine Aspirin tablets in the large bottles.

Made in Canada

## When PAIN Comes

WHAT many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes the acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia.

One spoonful of this harmless, tasteless alkali in water neutralizes instantly many times that much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go, get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. 50c a bottle—any drug store. (Made in Canada.)

Miss Mary Harris of Calgary, is visiting at the home of Mr. and Mrs. G. Oliphant.

Don't forget the Carnival at the Carbon skating rink tomorrow (Friday) night.

**COMMUNITY NEWSPAPERS**

The influence of community newspapers in relation to metropolitan dailies is often a point of discussion. It is worth reading the comment on this topic by Arthur Brisbane, the American columnist.

"The smaller newspapers of the country are the most important newspapers, and incidentally in proportion to their circulation their advertising results are the biggest and their advertising rates the lowest in the country. They are read through from end to end. Every copy of circulation always means an entire family, not a family that lives in one room with a can opener, but a family that owns its own home, and land around it, at least ninety times out of a hundred; a family that buys everything from the roof on the house to the cement on the cellar floor, from the hat on mother's head to the shoes on the boy's feet. The service that their publishers render to the public is in my opinion, the most important service rendered by any class of citizens in Canada. The country editors are the distributors of information; they reach the minds of the boys who leave the farms, and they are the nation's mental police force."

Don't attempt to be printers. It does not pay you in the end. Instead, have your local poster and other printing done at The Chronicle Office. We will quote you a reasonable price on all work. Not only this—if you are putting on an entertainment, etc. and have your printing done here, you get access to our free reader space in this newspaper, which is worth more to you than the paltry sum you spend for other forms of advertising.

Don't pass up your local printing establishment when you have printing to do. Your patronage only will keep a newspaper in Carbon.
